

1. At the Logo Page. Touch the Screen to begin accessing the available options.

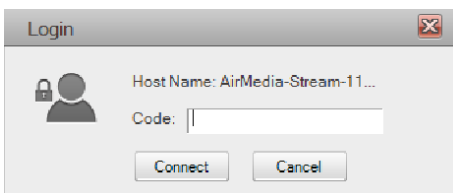

2. Tap the Presets option.

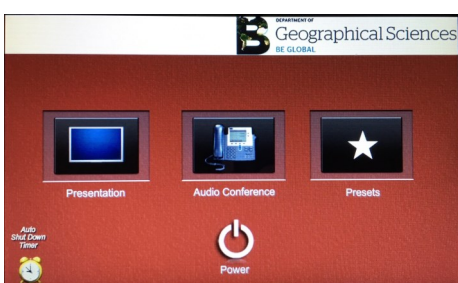

3. Now tap on the Display Air Media button. This will switch the projectors source to the streaming device.

4. On your laptops browser enter the IP address that appears at the top black bar of the screen. First time users will be asked to download and install the AirMedia App.

5. Run the AirMedia App and enter the 4 digit code that appears next to the IP address on the projection screen.

6. When finished turn off the system. Tap the home button on the screen. Once on the Home screen tap the Power Button.
