University of Maryland  
Department of Geographical Sciences  
College Park, MD 20740

The Department of Geographical Sciences at the University of Maryland (College Park) invites applications for a tenure-track faculty position at the rank of Assistant Professor in the area of Geographic Information Science. This position is part of the recently established Center for Geospatial Information Science (CGIS) (see https://geospatial.umd.edu/ for more information). This position will have its tenure home in Geographical Sciences and is expected to start on or about August 2017. Salary and benefits are highly competitive, commensurate with qualifications and experience. A Ph.D. degree in Geography or a related discipline is required by the time of appointment. Candidates should demonstrate commitment to excellence in research and teaching, and show promise for gaining external funding. Preference will be given to candidates with postdoctoral experience.

The University of Maryland, College Park is the flagship campus of the University of Maryland System and is ideally situated in close proximity to Washington, D. C., Baltimore, and Maryland’s 270 Technology Corridor. The University is committed to attracting and retaining outstanding and diverse faculty and staff that will enhance our stature of preeminence in our three missions of teaching, scholarship, and full engagement in our community, the state of Maryland, and in the world.

We are seeking an outstanding candidate who will expand the breadth in our research and teaching and enhance our national and international reputation in Geographic Information Science (GIScience). Candidates are expected to have a demonstrated commitment to teaching and mentorship at both the undergraduate and graduate levels, including working with students and groups from underrepresented backgrounds. Successful candidates are expected to conduct research at the leading edge of GIScience, and be able to work in interdisciplinary teams that address significant real-world problems. We especially encourage applications from candidates with a background in spatial data analysis, and spatial statistics, spatial data modeling, geospatial visualization and analytics, and high-performance and cloud computing for geospatial data, among others. Possible applied GIS research areas include: global environmental change and hazards; geospatial intelligence and security; and enabling citizen science among other topics associated with the application of GIScience to societal and environmental issues from local to global scales.

Applications should include a personal statement on background and experience relevant to the position, including research, teaching, and service activities, a signed and dated Curriculum Vitae, reprints of selected peer-reviewed publications, and the names, addresses, and email addresses of three references. The Department of Geographical Sciences is committed to increasing the diversity of the campus community. Candidates who have experience working with a diverse range of faculty, staff, and student and who can contribute to the climate of inclusivity are encouraged to identify their experiences in these areas.
For best consideration applications should be submitted no later than **November 15, 2016** but the search will continue until a suitable candidate is appointed.

**To Apply:** [http://ejobs.umd.edu/postings/46689](http://ejobs.umd.edu/postings/46689). Applications from women and minorities are particularly sought. The University of Maryland is an Equal Opportunity Affirmative Action Employer.

Further information on this position and on academic and research programs of the Department and CGIS can be found at [http://www.geog.umd.edu](http://www.geog.umd.edu). Questions regarding this position can be directed to Search Chair, Professor Kathleen Stewart, stewartk@umd.edu.
